

Worksheets Circulated:

Note the specific disaster risk to the site in one sentence. What are the potential sources/ hazards?

What are the assumptions regarding the vulnerability of the site?

Explain the chain of events for this specific disaster: from causes to the effects. What management systems are in place? What is missing?

Note: This will be based on participant assumptions

How probable do you think this event is for the site? What data can you provide to justify your decision?

LOW/MEDIUM/HIGH

What will be the damage to various elements in the site? Will the whole site be affected or just a part? Could you tell which attributes of the site will suffer damage and to what extent?

CATASTROPHIC/MILD/GRADUAL/NO CONSEQUENCE

What does this damage means in terms of loss in values for each attribute? How do these aggregate to the loss of significance of the site as a whole?

TOTAL/SIGNIFICANT/MODERATE/MINOR

What is the level of risk for this specific scenario?

EXTREME/HIGH/MODERATE/LOW

Options	Disaster Scenario	Possibility (low/medium/high)	Which Attribute /Aspect of Site would be impacted?	Severity of Impact (catastrophic/severe/mild/gradual)	Potential loss of value /qualifiers (total / significant /moderate / minor)	Level of Risk (Extreme / High / Moderate / Low)
Option 1						
Option 2						
Option 3						

The risk evaluation will help in prioritising risk mitigation actions. However this aspect will be dealt in the subsequent module.
